

Introducing Rotovac's Revolutionary 360[®] Deep Cleaning Buffer Head!

Most Cleaners Use A Manual Extraction Push Wand which:

- Cleans from **2** directions (up and back) with a couple of **cleaning passes**
- Relies on the strength and energy of the worker
- Leaves many tough stains and shadowing in the carpet

I Use the Rotovac 360[®] Deep Cleaning Buffer Head because it:

- Cleans from **all** directions revolving at over 100 RPM (**100 cleaning passes per minute**)
- Has high torque motors that do not get tired so that the quality is consistent throughout the entire job
- Restores matted traffic areas and removes tough stains and shadowing that the manual wand leaves behind
- Is a "buffer" that has smooth gliders which gently opens up the carpet
- Weighs 39 lbs and forces the water deep into the carpet and sucks it out much better than the push wand

39 Lbs.
